

RACE REPORT

Last weekend was my first ever weekend at JSCC, and at Snetterton, so we were hoping just to finish in one piece!

FRIDAY

We got to the track early on Friday and managed to get some great testing in ending the day on a 2:29.9, and with no major issues

SATURDAY Qualifying

P18, P17, P13

A slightly frustrating session not to get a good few laps down but some pretty good starting positions for the races for our first weekend!

Race 1 - P18 to P18

After getting an okay start, I managed to hold my position, but then it became apparent I was heavily lacking some speed and began to drop places and lose heaps of time, but for the rest of the race I spent cruising getting lots of practice in and kept it all on the track, for a great result in our first race.

SUNDAY

Race 2 - P17 to P17

Sort of the same story as Race 1, botched the start a little but unfortunately, we still really lacked down the straights with not much we could do at the track to rectify the issue

Race 3 - P13 to P16

After some changes in the car before the last race, we had some good pace for the start managing to keep up for a bit, before the power started to drop off again, and dropped places like a stone, but still managed to keep it all on the black stuff to finish my first race weekend cleanly with no major excursions!

Overall, it was a good weekend for my first and hopefully the issues will be fixed for my next time out when we come back to Snetterton and start to push up the order a bit.

Massive thanks to Cursley and everyone involved who helped this to happen, and everyone who has welcomed me so well to a change of scene
