

Race 1

P9 to P10

After a mega start up to P8, we managed to fend off Timothy for a few laps until eventually he got through for good and then followed by Martin Wright after a charge from the back, coming home for a great result in only my second meeting.

Race 2

P10 to P16

Sunday morning was more than wet, so it was straight into learning with the great Ash Miller to prepare me for my first ever laps in the rain in a car. I got huge wheelspin on the start and dropped a few, and then a few laps later some contact on the rear meant I had to come in the pits for repairs, only getting a few places from the crashes in the laps that followed.

Race 3

P10 to P16

I had a great start getting just ahead of P9, then contact sent me sideways and eventually to a standstill at just the first corner. I managed to make 2 more places by catching the back of the pack, but I ran out of time to close the gap to the next pack, despite being almost 2 seconds a lap quicker. This race was a great learning race, and the whole weekend in general.

Every time I went out, I came back having learnt at least one new thing and our pace was almost 4 seconds quicker compared to my first race at Snetterton a few weeks prior.

Huge thanks to everyone at Cursley Motorsport, Alex, Sheila, Ash, Louis, Will, my parents, and everyone who came to the tent to talk, and to all the competitors, marshals, organisers and visitors for a great weekend of racing.

This weekend was great for my confidence, and I can't wait to push for even better results next time out for the last race at Silverstone!
