

RACE REPORT – DRS RD1 GYG 2026

Rd 1 - Season was **finally getting underway**, and it all started here, the first round at GYG, so how did it go?

SATURDAY: Practices

All through the morning we were **seeming good for pace** and all round was consistent, so we hoped I could finally get a good qualifying!

Qualifying: P8

Unfortunately, I still struggled with **new tyres and getting laps** down quickly, and frustratingly I was way down the order, with it all to make up.

SUNDAY: Heat P8  P5

Good race, managing to get back up **a few places** to the front pack but would have been happier to get a little further.

Pre Final: P5  P5

A **frustrating race** and just could not find a way to get past anyone in the train especially with the crazy tow in Wales.

Final: P6  P6

After getting up to 5th, a move at the final corner ended up with me getting freight trained down the order so I had to again cut through the pack, and by the time I had, **I was out of the leading pack's slipstream** and stuck on my own.

Although it wasn't as high as we wanted to be, it was at least **consistent results** that did well to the championship.

Thanks as always to Simon on the spanners and **my parents as always for making this all work!**
